

INSTRUCTIONS

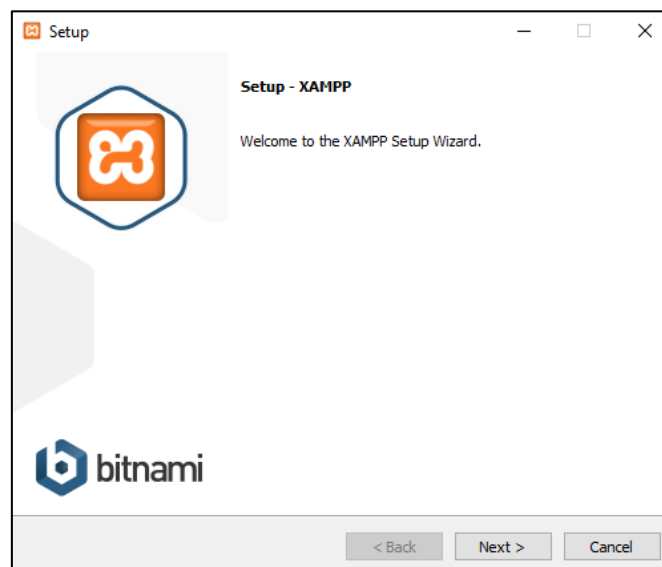

- Go to- <https://www.apachefriends.org/index.html>
- Download the relevant version:

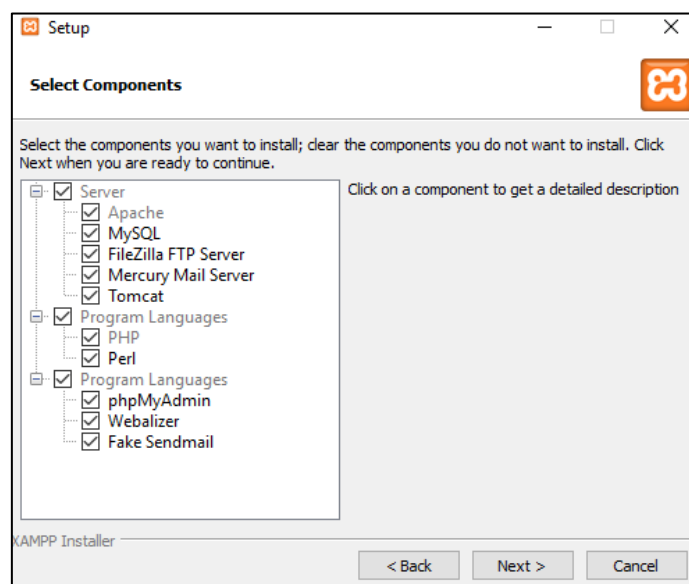

- Click 'run'

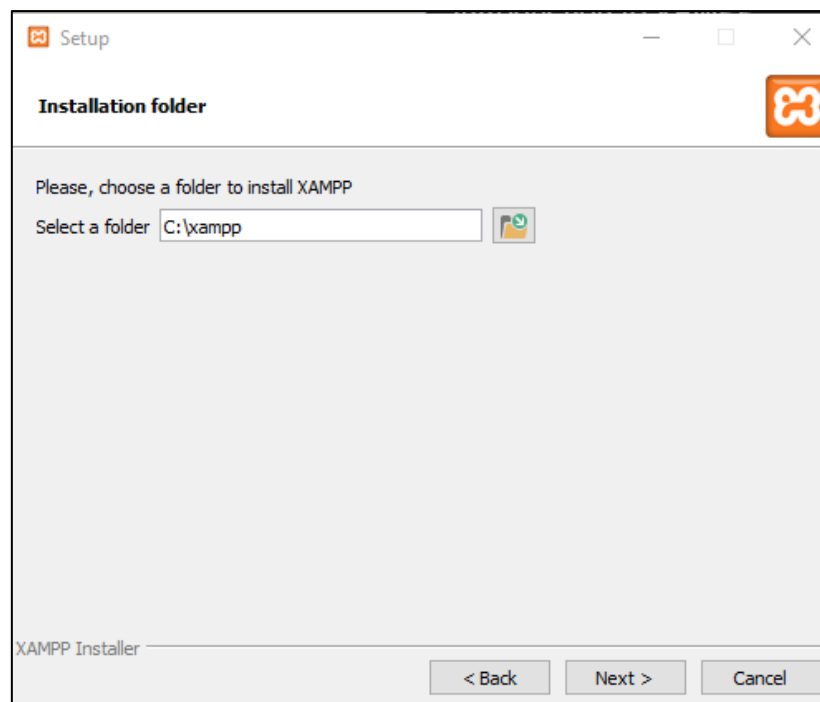

- Allow to tool to make changes
- Click 'next'

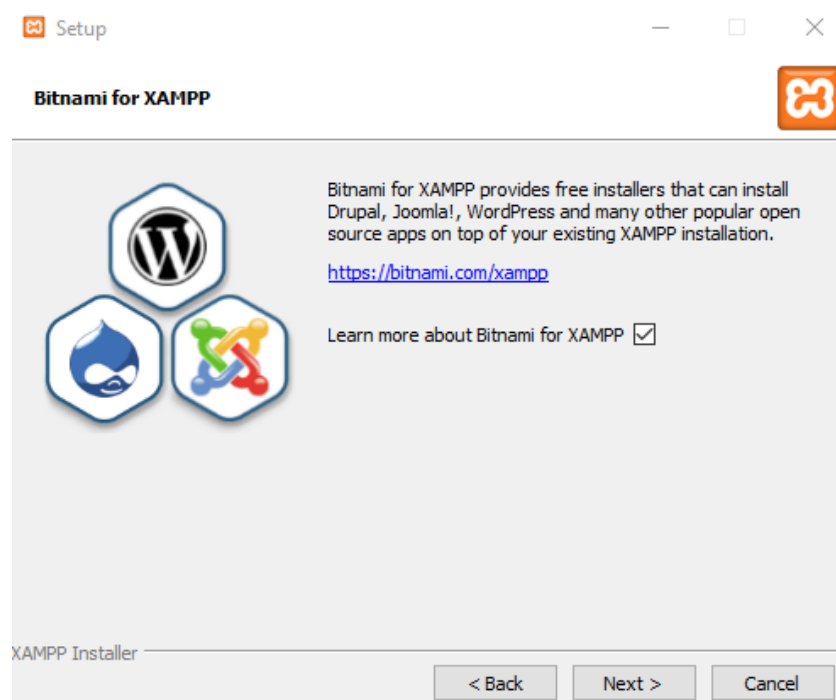

- Click 'next'

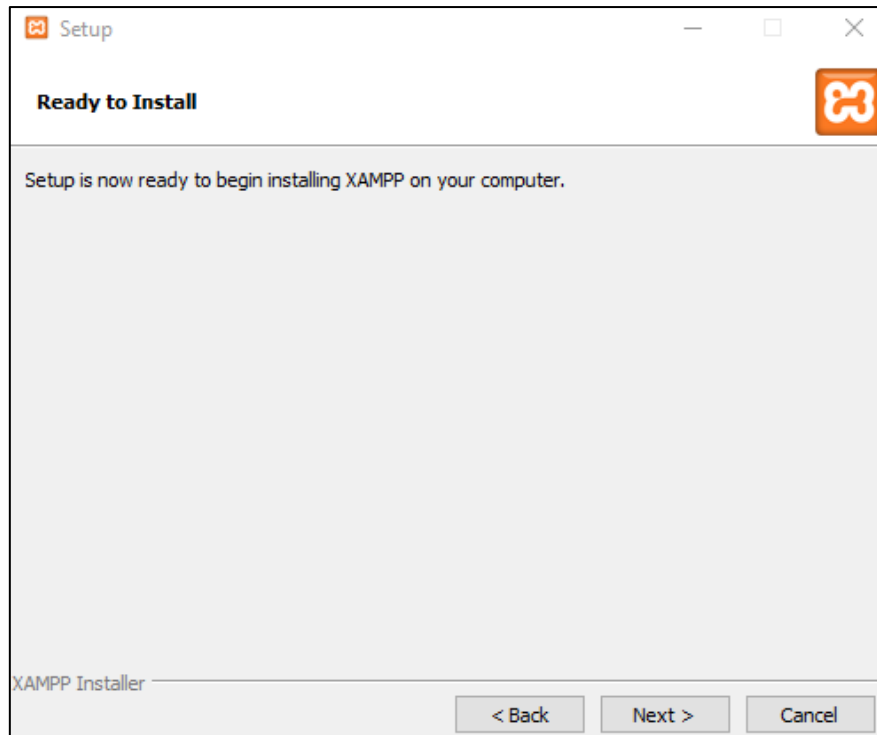

- Click 'next' to create an XAMPP folder in your C drive

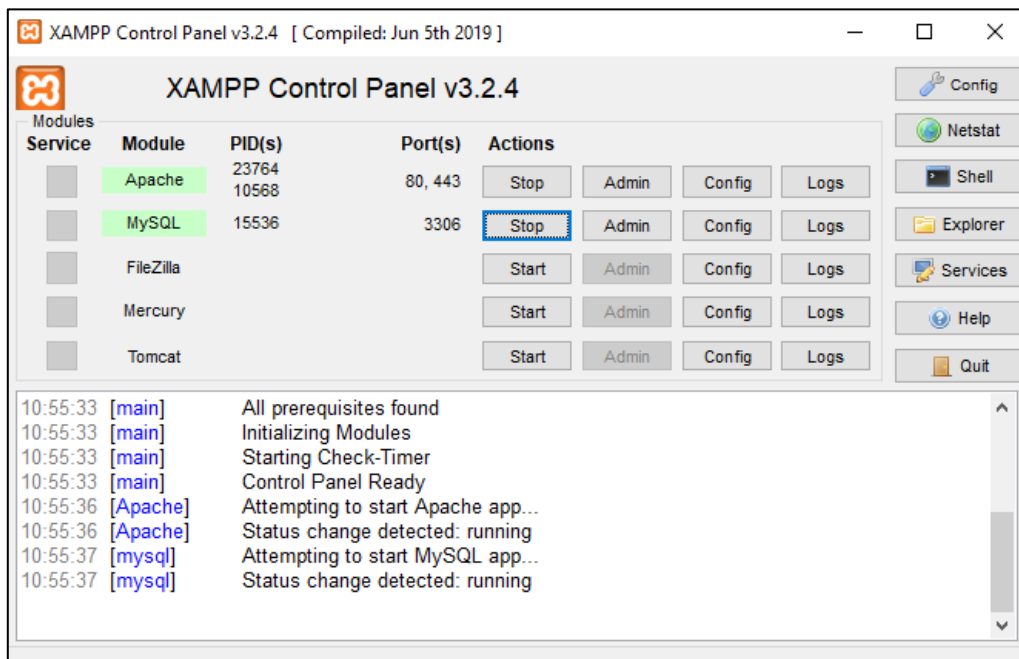

- Click 'next'

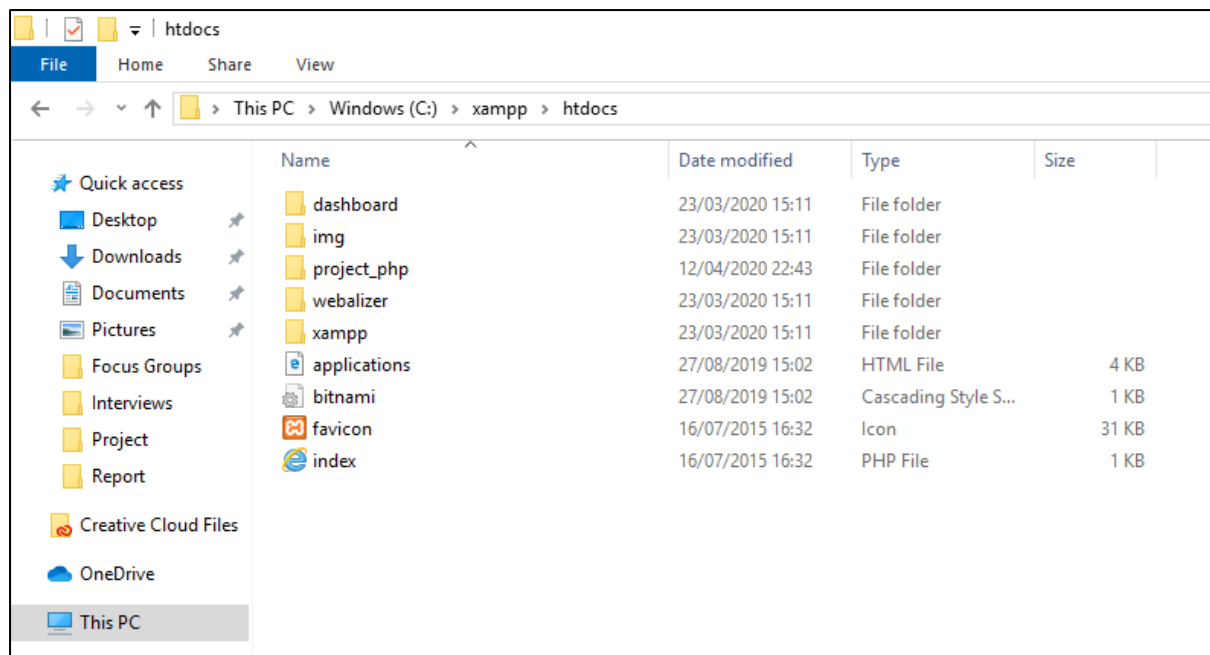

- Click 'next' and install

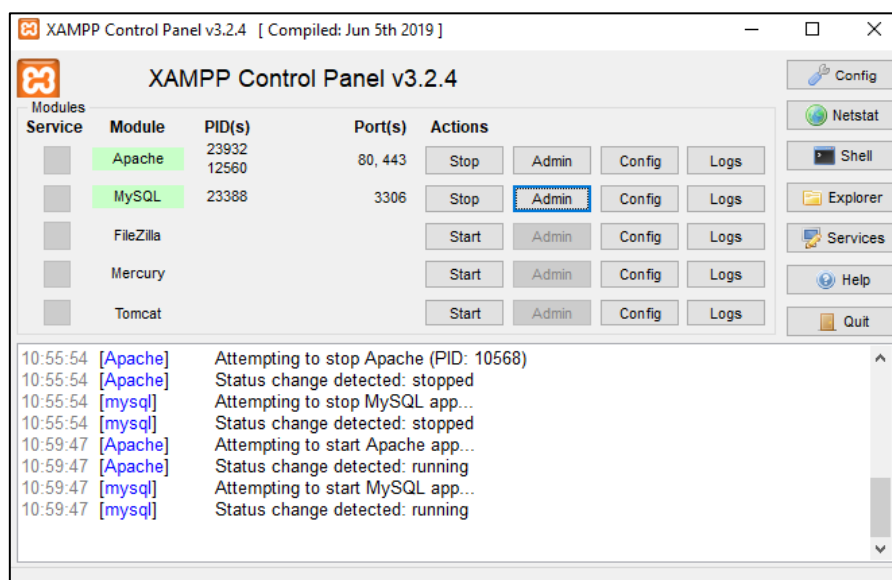

- In your computer search 'XAMPP control panel' and press start on the 'Apache' and 'MySQL' modules

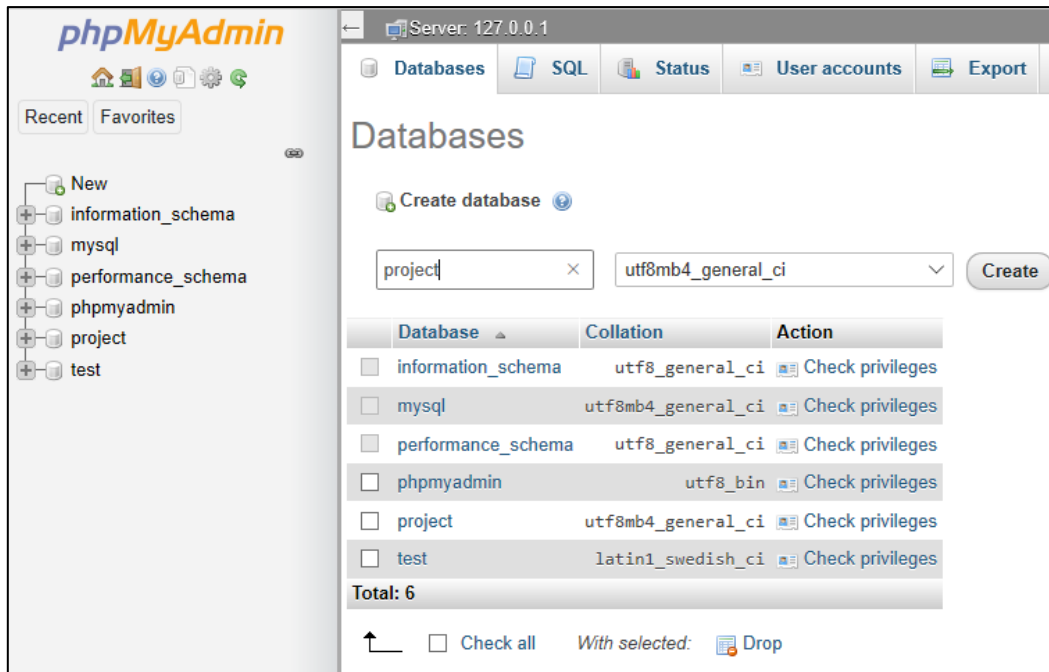

- Copy 'project_php' folder containing the projects code
- Navigate to 'Windows (C:)
- Navigate to 'xampp'
- Navigate to 'htdocs'
- Paste the folder in the 'htdocs' folder

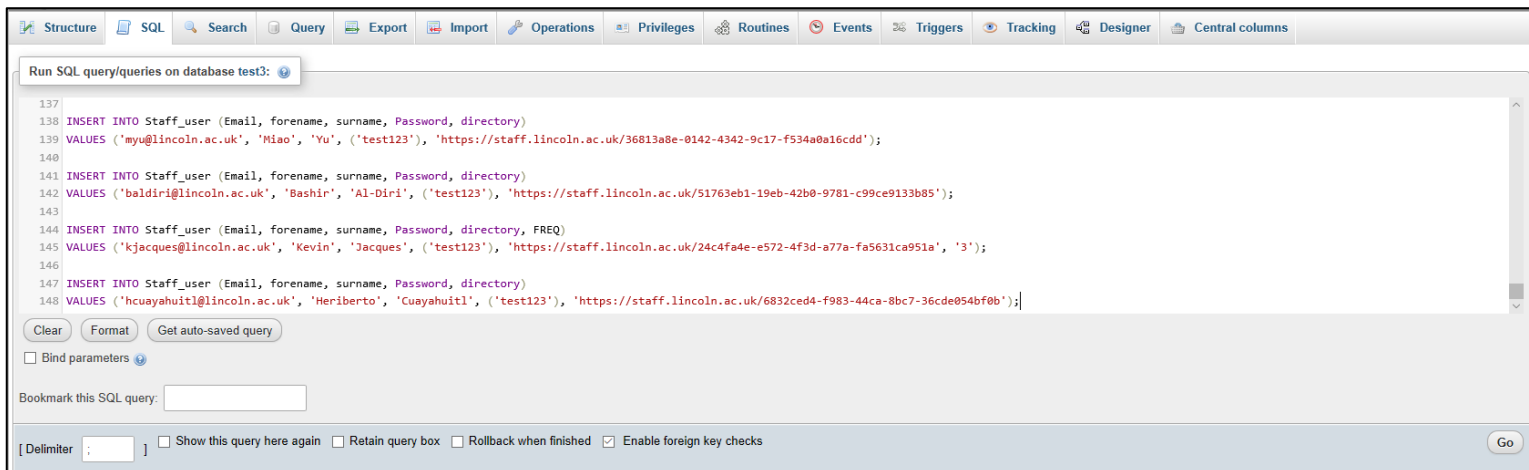

- On the XAMPP control panel, click the MySQL 'Admin' tab. This will open PhpMyAdmin

- Click the 'Databases' tab and create a new database called 'project'

- Following this, go to the 'SQL' tab. Copy the code in the file 'SQLTest.sql' within the 'project_php' file and paste it in the text box. Then press 'go'.

- Open up your internet browser and in the search bar at the top of the page, search 'localhost/project_php'
- You are now ready to test the system!
- The database has been populated with dummy data and the academic frequencies have been manipulated so that not all choices are available!
- W Christian, D Foster, C Headleand and J Holopainen have been given high frequencies for testing purposes
- All passwords are set to 'test123'
- For the staff portal use: kjacques@lincoln.ac.uk, hcuayahuitl@lincoln.ac.uk or baldiri@lincoln.ac.uk

- For the student portal use any of the accounts shown below:
